

GILMARK D MELLO JOINS TMC MARINE AS CONSULTANT MARINE ENGINEER

October 28 2024

London, UK: TMC Marine has announced the appointment of Gilmark D Mello to its global marine engineering team as the company continues to scale its operations and scope of consultancy services in the UK, USA and Asia.

Gilmark is a Chartered Engineer with broad maritime experience including:

- Technical expertise gained as a Chief Engineer onboard ships
- Risk management
- Technical failure analysis and accident investigation
- Maritime decarbonisation and environmental regulations with experience of writing technical and operational procedures to mitigate operational risks.

He holds a Registered Environmental Practitioner (REnvP) credential with in depth knowledge of marine environmental regulations and the operational risks associated with alternative fuels.

Gilmark joins TMC Marine from Lloyd's Register where, as a Senior Sustainability Specialist, he utilised his extensive technical expertise in assessing the viability and safety aspects of maritime decarbonisation pathways including onboard carbon capture and the deployment of alternative fuels.

He also worked on the development of training and competency standards for seafarers on alternative fuelled ships and maritime regulations.

Previously, Gilmark has held roles in the areas of Consultant Business Transformation and Health, Safety, Environment and Quality (HSQE) management.

He has 20 years' seagoing experience including nine as Chief Engineer on large container ships, gas carriers, bulk carriers, general cargo ships and passenger ships in companies including Seaspan and Wallem giving him a wide

exposure to maritime technical and operational risks. He holds a Chief Engineer unlimited III/2 Certificate of Competency.

Head of Engineering at TMC Marine, Gary Rawlings said: "Gilmark's knowledge and experience provides clients with a broad understanding of both operational risk and critical technical analysis and the root cause analysis of technical failures, incidents and accidents, including vessels with alternative fuels and novel technologies."

Gilmark said: "Joining TMC Marine gives me the opportunity to utilise my maritime expertise in analysing technical failures and accident investigation, while being mentored by the best in the industry. I also look forward to working with our clients in mitigating operational risks in the current fleet of vessels, and in understanding the emerging operational landscape for vessels with alternative fuels."

TMC Marine's marine engineering team works out of the UK, Singapore and Australia. Gilmark is based out of the London office.

ABOUT TMC MARINE

TMC Marine, a Bureau Veritas Group Company and leading international marine consultancy, has been providing advice and support to the marine and offshore energy industries since 1979.

The company offers a comprehensive range of marine surveying and consultancy services through its team of naval architects, marine engineers and master mariners, assisted by an in-house technical support team.

TMC Marine provides technical assistance across a wide range of matters ranging from the planning and execution of high risk marine operations to the investigation and resolution of major maritime incidents and disputes. The company has three Special Casualty Representatives (SCRs) on the Lloyd's Panel.
